Description

Error in console:

Uncaught TypeError: Cannot call method 'getUTCFullYear' of null (Stats.js:314)

The Stats View should check for no temporal data coverage and load a blank chart.

History

#1 - 09/18/2014 07:26 AM - Lauren Walker

- Status changed from New to Resolved

This error was being caused when the index had no values for the field beginDate. The Stats Model now just uses the earliest endDate instead of the earliest beginDate when none are found. If neither are found, a blank chart is drawn.
