There is a bug where the Member Node filter is not being removed when the "Clear all" button is clicked.

#4 - 01/13/2015 12:36 PM - Lauren Walker

- Status changed from In Progress to Resolved

The aforementioned bug was happening because the Search model now has objects as filters but the Search model "defaults" attribute was a reference to a JS object. The "defaults" attribute is now a function that returns that object so that changes to the search model filters will not disrupt the defaults object. It is now working as expected in all themes.
