Description <p>DataONE needs to report on a set of standardized statistics on a quarterly basis. It would be good to modify the display in the /#profile page to show all of the statistics needed, as well as to provide the most recent quarterly summaries in a table. Below are the set of needed stats:</p> <ul style="list-style-type: none">• Data Downloads• Data Uploads• Number of data files available• Total size of data files available• Number of metadata files available• Total size of metadata files available• Number of Member Nodes <p>Many of these could be added to the existing graphs. I think it would also be useful to provide a table showing all of these statistics for the most recently completed quarter. Maybe more, let's discuss.</p> <p>Dave shows how to calculate these stats via SOLR queries here:</p> <ul style="list-style-type: none">• https://repository.dataone.org/documents/Projects/cicore/operations/source/recipes/metrics_report.txt <p>We also have to report on these, but they probably should come from another source:</p> <ul style="list-style-type: none">• Number of tools in Investigator Toolkit• Number of publications• Uptime of CNs <p>Dave has a system that distinguishes all read events from reads from non-CN sources. See https://monitor.dataone.org/_production_history/log_history.html</p> <p>We may want our statistics to also filter out CN reads, as well as other robots.</p>

- Target version changed from 1.8.0 to 1.9.0

#4 - 11/04/2015 12:35 PM - Lauren Walker

- Target version changed from 1.9.0 to 1.12.0

#5 - 01/04/2016 02:33 PM - Lauren Walker

Got a request from Amber today to add to our wishlist:

- Percentages in donut charts where file formats are
- Histogram of file sizes

#6 - 01/19/2016 09:56 AM - Lauren Walker

- *Target version deleted (1.12.0)*
