#### Description

If you create a package locally (i.e. not sent to metacat when created) and then send it to metacat using Synchronization command, the package sent to metacat does not have public access even though original package has public access set to read.

If the packaga is submitted when it is created the access is correct (i.e. access is public)

#### History

##### #1 - 11/05/2002 03:41 PM - Dan Higgins

Never mind - apparent user error!

##### #2 - 03/27/2013 02:14 PM - Redmine Admin

Original Bugzilla ID was 666
