Description

The XSLT for the metacatui skin is skipping over some text values, such as abstract and method descriptions.

History

#1 - 02/25/2015 12:34 PM - Lauren Walker

- Status changed from New to Resolved

- Target version changed from 2.4.2 to 2.4.3

In the EML xslt "text" template, check if there is a value directly in the text node rather than only looking in section or para children nodes.
