

MetacatUI - Bug #6679

Relative links in the External View may not be correct on KNB

03/02/2015 09:42 AM - Lauren Walker

Description

Links with relative URLs are not working correctly in the External View in the KNB because they will be relative to <https://knb.ecoinformatics.org> instead of <https://knb.ecoinformatics.org/software/dist>, for example.

I should go through all the links in the KNB, especially in the Tools page and external EML page, and make sure all the links are ok and fix them as needed.

History

#1 - 03/02/2015 09:45 AM - Lauren Walker

See ticket #11015 on Web RT for how this was discovered: <http://support.nceas.ucsb.edu/rt/Ticket/Display.html?id=11015>

#2 - 06/29/2015 03:40 PM - Lauren Walker

- Status changed from New to Resolved

Links in the External View will be directly navigated to when their extension is pdf, exe, tar, tar.gz, bin, or zip. Other links should render correctly in the External View.
