

MetacatUI - Task #6686

Story # 6598 (Resolved): Add Provenance to the DataCatalog and Metadata views

Make sure the provenance displays correctly in the Metadata View

03/05/2015 10:42 AM - Lauren Walker

Description

So far, I have been developing the provenance display in the Metadata Index View, since that is what the dataone theme currently uses. I need to make sure the charts are displaying in the Metadata View. One obstacle is that the Metadata View may not have an "entity details" section which contains metadata on data objects in the package. I will need to create one if the metadata doc does not have that.
