#### Description

When I log in to the CN portal and then search that CN for packages I can see the user icon with my CILogon DN and "my packages" and "logout" options. This is great! But we should have a button for signing in so users don't have to know where to go. We can start with a url like this:

<https://cn-sandbox-2.test.dataone.org/portal/startRequest?target=/portal/account.jsp>

But instead use an absolute URL for "target" param to direct them back to the MetacatUI page they started from when they have finished authenticating.

#### History

#1 - 03/11/2015 08:36 AM - ben leinfelder

- Status changed from New to Resolved

- Assignee changed from Lauren Walker to ben leinfelder

uncommented sign in link in the dataone theme and used the CN portal -> CILogon -> original page route for this.
