

Morpho - Bug #672

lat/lon validation and conversion

11/08/2002 08:37 AM - Matt Jones

Description			
Morpho allows input of latitude and longitude values in EML. EML specifies that these should be in decimal format, not degrees/minutes/seconds. Users may, however, try to enter them that way. Morpho needs to: 1) validate that lat/lon values are correctly formatted 2) possibly provider an automatic conversion to decimal degrees when people enter DMS
