

MetacatUI - Task #6766

Story # 6716 (Resolved): Production-ready DataONE theme

Task # 6765 (Resolved): Bugs with zooming in and out on the Gmaps interface

Navigating back to search results doesnt always have the same map zoom

06/02/2015 01:55 PM - Lauren Walker

Target version:	1.7.0	Spent time:	0.00 hour
Description			
From Yiwei Wang: For example, if i zoom in to an area with 3 datasets, i can see 3 search results in the center column, but when i click on a dataset and then return to the search results - it returns to a page where the map is completely zoomed out, but it still displays the same three search results. It is just kind of confusing because then you can't find where you were on the map anymore.
