History

#1 - 06/05/2015 09:08 AM - Lauren Walker

- File *browser_version-ww-monthly-201405-201505.csv* added

Current browser version popularity will determine which browsers to test on. Attached spreadsheet taken from http://gs.statcounter.com/#desktop-browser_version-ww-monthly-201405-201505

Browser versions to test, based on popularity:

IE 8, 9, 10, 11, with focus on IE 8 and 11

Firefox 37, 38

Safari 7, 8

Any version of Chrome that users have installed. I think Chrome makes it almost impossible to roll back to an older version. Over 25% of internet users have Chrome 42 anyway, which is very recent.

#2 - 06/11/2015 04:37 PM - Lauren Walker

- File *Chrome.tiff* added

- File *Firefox.tiff* added

- File *IE.tiff* added

- File *safari.tiff* added

Updated list of browser versions, based on Google Analytics data from www.dataone.org. (See Attached)

Chrome - 50% of sessions, almost all v. 40+

Firefox - 22% of sessions, almost all v. 30+

IE - 12% of sessions, half are v. 11, then v.9, v. 10, v. 8

Safari - 9% of sessions, half are v. 8 and a little of v. 7.

#3 - 06/24/2015 01:30 PM - Lauren Walker

- File *Issues_AllBrowsers.docx* added

- Status changed from *New* to *In Progress*

Attached is the first chunk of feedback from Rachel. All but two of these issues have already been fixed in the past week or so. I'll create a ticket for the outstanding issues (collapsing the member node list and browser zooming displaces the map).

#4 - 06/25/2015 09:27 AM - Lauren Walker

- File *FireFox_IE_Chrome_Windows7.docx* added

Report from a UA team member using Windows 7.

#5 - 07/01/2015 09:56 AM - Lauren Walker

- Status changed from In Progress to Resolved
