Description			
<p>The Public Library of Science harvests citations from certain 'sources' such as DataCite and associates these with identifiers from participating repositories, such as DataONE. A public api is available to access this info: http://dlm.plos.org/api</p> <p>Update the SearchResults view to include citation count for a dataset from PLOS DML api. Create a new view "Citations" to contain the text of a citations for a dataset.</p>
