

MetacatUI - Bug #6789

SolrResults collection doesn't update when filters are changed before a response is returned

06/26/2015 10:57 AM - Lauren Walker

Status: Resolved	Start date: 06/26/2015
Priority: Normal	Due date:

Category:	Estimated time: 0.00 hour
Target version: 1.7.2	Spent time: 0.00 hour
Bugzilla-Id:	
Description When a search is sent and the app is loading, if the user changes another filter, sometimes the SolrResults collection doesn't update when the second set of results is received. So the list of search results in the UI is one filter behind and incorrect. See screenshot of an example

History

#1 - 07/15/2015 11:34 AM - Lauren Walker

- Target version changed from 1.7.1 to 1.7.2

#2 - 07/20/2015 01:54 PM - Lauren Walker

- Status changed from New to Resolved

The Stats model and SolrResults collection now caches the latest version of the user query. When a response is received from Solr, the results and page statistics (e.g. year slider) will not update unless the response is from the latest query.
