Metacat - Support #6793

Update DOIs from KNB to redirect to view service

07/02/2015 12:00 PM - Matt Jones

Description

In #6530 and #6440, we added features to update DOI registrations, but we still have many originally assigned DOIs that redirect to the raw EML document rather than our landing page for a data set. We need to fix all of the /AA/ DOI registrations in the KNB and ensure they point to the right View service page. For DOIs for metadata, that would be the associated /view url for that DOI. For data files and resource maps, its to the view for the associated metadata. E.g.,

- Metadata doi:10.5063/AA/nceas.227.15 should redirect to https://knb.ecoinformatics.org/#view/doi:10.5063/AA/nceas.227.15
- Data doi:10.5063/AA/wtyburczy.30.1 should redirect to the same metadata file https://knb.ecoinformatics.org/#view/doi:10.5063/AA/nceas.227.15

Also, when a user updates metadata for a package (but doesn't change the data), the DOI redirect for the data will need to be updated to point to the new metadata. Let's verify that this is happening automatically in Metacat.

History

#1 - 07/02/2015 12:46 PM - Lauren Walker

MetacatUI 1.7.0 will redirect to the associated metadata view for any given data pid. So managing the EZID registrations for those DOI's, at least, is unnecessary.

#2 - 01/25/2016 07:33 AM - ben leinfelder

- Priority changed from Normal to High

Megan Force at Thompson Reuters is reporting our old DOIs still point to XML representations of the metadata rather than the #view landing page.

#3 - 01/25/2016 07:48 AM - ben leinfelder

- Status changed from New to In Progress

I was able to use our Metacat admin tool to update an example DOI - doi:10.5063/AA/dpennington.338.2 now points to the #view page. Running the update routine for all EML format ids now.

#4 - 01/25/2016 10:16 AM - ben leinfelder

Ran the DOI updater for EML 2.0.0, 2.0.1, 2.1.0, and 2.1.1 formats. All EML DOIs should be resolving to the #view endpoint now.
