Morpho - Bug #68

Query performance inhibits UI refresh

08/18/2000 05:47 PM - Matt Jones

Bugzilla-Id:	68			

Description

When a query is launched, especially when local queries are running, there is a very long delay before all of the appropriate windows refresh. This needs to be fixed so that, after launching a query, it is run asynchronously (probably in its own thread). This way, the UI code can refresh the windows immediately and the user won't getthe feeling that the applicaiton is "frozen".
