Description			
<p>When I tried to open the search interface on metacatui, I got an exception: <error detailCode="Solr server error" errorCode="500" name="ServiceFailure"> <description> org.apache.solr.client.solrj.SolrServerException: java.lang.NullPointerException </description> </error></p> <p>The query is: https://valley.duckdns.org/metacat/d1/mn/v1/query/solr/q=+-obsoletedBy:*+formatType:METADATA+++&beginDate:18*%20OR%20beginDate:19*%20OR%20beginDate:20*+&-obsoletedBy:*&rows=1&fl=beginDate&sort=beginDate+asc&wt=json&json.wrf=jQuery19105484170392155647_1446665703473?_=1446665703474</p> <p>But it works on knb: https://knb.ecoinformatics.org/knb/d1/mn/v1/query/solr/q=+-obsoletedBy:*+formatType:METADATA+++&beginDate:18*%20OR%20beginDate:19*%20OR%20beginDate:20*+&-obsoletedBy:*&rows=1&fl=beginDate&sort=beginDate+asc&wt=json&json.wrf=jQuery19105484170392155647_1446665703473?_=1446665703474</p>			

History

#1 - 11/04/2015 02:32 PM - Lauren Walker

- Project changed from Metacat to MetacatUI
- Assignee changed from Jing Tao to Lauren Walker
- Target version changed from 2.5.0 to 1.8.0

#2 - 11/04/2015 03:06 PM - Jing Tao

The reason is the url has a "?" and Metacat thinks the query part is after that symbol. If we use /query/solr/?q=..., it works.

#3 - 11/04/2015 04:33 PM - Lauren Walker

- Status changed from New to Resolved

The AppModel now has a setting for "use jsonp" which when set to true, will add a "?" to the end of the query service url
