

## MetacatUI - Feature #7008

### Reconfigure 'Sign in with ORCID' to redirect to the login form, not the registration form

04/04/2016 12:48 PM - Bryce Mecum

<b>Description</b>			
<p>When I click on 'Sign in with ORCID' from a page like <a href="https://arcticdata.io/catalog/#page/0">https://arcticdata.io/catalog/#page/0</a>, I get sent to <a href="https://orcid.org/oauth/signin">https://orcid.org/oauth/signin</a> {...} which shows a register page for a new ORCID. My first time doing that, I was confused and had to search for the small 'Sign In' text which was hard to spot. I now know what to do but I can imagine this being confusing for new users.</p> <p>I checked how that 'Sign In' text works and I found that, if the URL is changed from <a href="https://orcid.org/oauth/signin">https://orcid.org/oauth/signin</a>{...} to <a href="https://orcid.org/oauth/signin{...}#show_login">https://orcid.org/oauth/signin{...}#show_login</a> then the login form shows first instead of the register form. This comes from inside the Angular app that drives the UI of the site:</p> <pre>\$scope.loadAndInitLoginForm = function() {   \$scope.isOrcidPresent = false;   \$.ajax({     url: getBaseUri() + '/oauth/custom/authorize/empty.json',     type: 'GET',     contentType: 'application/json; charset=UTF-8',     dataType: 'json',     success: function(data) {       \$scope.authorizationForm = data;       if(\$scope.authorizationForm.userName.value) {         \$scope.isOrcidPresent = true;         \$scope.showRegisterForm = false;       }       // #show_login - legacy fragment id, we should remove this sometime       // after November 2014 and only support &amp;show_login=true       if(window.location.href.endsWith('#show_login'))         \$scope.showRegisterForm = false;       else if(!\$scope.isOrcidPresent)         \$scope.showRegisterForm = !orcidVar.showLogin;     }   });   \$scope.\$apply(); }.fail(function() {   console.log("An error occurred initializing the form."); });</pre> <p>This isn't a sanctioned change and could break in the future, as evidenced by the comment. However, if they update their app to behave differently, adding #show_login to the URL should just dump the user to the registration page like it currently does so I think this is a pretty safe change to make.</p>			

#### History

##### #1 - 04/04/2016 12:55 PM - Bryce Mecum

Lauren noted that this isn't a Metacat UI concern but a CN portal one. Closing.

##### #2 - 04/04/2016 02:20 PM - ben leinfelder

This will be the change in portal:

<https://members.orcid.org/api/customize-oauth-login-screen#show-signin>

##### #3 - 04/04/2016 02:40 PM - Bryce Mecum

Great, thanks Ben. That's 1000x better than what I came up with. What channels do we need to go through to get that in? Can I file a ticket

somewhere other than MetacatUI?

**#4 - 04/04/2016 02:42 PM - ben leinfelder**

- *Status changed from New to Rejected*

Moved this over to DataONE: <https://redmine.dataone.org/issues/7707>

**#5 - 04/04/2016 02:45 PM - ben leinfelder**

FYI - this is now working in search-sandbox-2
