

Metacat - Bug #7018

MNodeService().updateSystemMetadata() doesn't honor the MN certificate

04/30/2016 10:18 AM - Chris Jones

Status:	Closed	Start date:	04/30/2016
Priority:	Normal	Due date:	
Assignee:	Chris Jones	% Done:	0%
Category:	metacat	Estimated time:	0.00 hour
Target version:	2.6.0	Spent time:	0.00 hour
Bugzilla-Id:			
Description			
When calling MNSStorage.updateSystemMetadata() with the Member Node cert (like CN=urn:node:ARCTIC, DC=dataone,DC=org), Metacat throws a NotAuthorized exception. It should honor the certificate for pids where this MN is authoritative.

- Status changed from New to Closed

I've committed this to the 2.6.0 branch, merged to the trunk, and merged to the 2.6.0-alpha-2 branch. Should be done.
