Description			
When defining Attribute/columns as unordered, enumerated values with codes: When I select the checkbox "Attribute contains free-text in addition to those values listed above" and check back on the column later, the window that pops up when I select "edit column description" is the Morpho Editor interface instead of the "Define Attribute/Column" interface.

For some reason we were adding a "pattern" element when the checkbox was selected but were not handling the element when returning to the form. I have removed the pattern element.

```
//returnMap.put(xpathRoot + "textDomain1/pattern1", ".*");
```
