| There was an NCEAS help ticket where the UI appeared but was not able to render the data. Looks like our handling of the shortcut URLs assumes full accession number (scope.docid.rev). We should handle cases where it is just scope.docid. |                |                        |            |
