History

#1 - 11/30/2002 03:08 PM - Michael Lee

This bug is a corollary to bug [#685](#), but applies to the communities module instead of the plants module. The changes that need implementing are moving level and parent from the Concept table to the Status table.

The name systems are OK in this module, as there is no "plantNameWithAuthor" equivalent that needs dealing with here, as needed dealing with on the plants side.

This bug depends on Bug [#709](#) only if we use the current data in the community module. If there is no data currently or we load new data, then Bug [#709](#) doesn't matter.

#2 - 01/08/2003 10:07 PM - John Harris

yep, this will have to be done.

#3 - 02/14/2003 03:41 PM - Gabriel Farrell

All machines are updated with this

#4 - 01/31/2005 02:54 PM - Michael Lee

changed from components that are to be deleted to "misc" so that bugs don't get deleted with component. Sorry for all the email.
