History

#1 - 11/30/2002 02:59 PM - Michael Lee

At one point in time, VegBank community module was loaded with an version of EcoArt's community concepts. It was not known which version of EcoArt was loaded. If VegBank still has commnuities loaded, we need to confirm which version was loaded. If this is unknown or difficult to determine, then it is probably easier to reload a new version, as per bug 706, with the new db architecture.

So this is not a critical bug, but it must be completed if we retain the version of the communities in VegBank. If there are no communities in VegBank or we delete them and load a new version, this bug can be considered resolved.

#2 - 01/08/2003 10:05 PM - John Harris

After the modifications of the community database (bug 708) the ecoart database will have to be reloaded -- all levels of the framework.

#3 - 01/08/2003 10:09 PM - John Harris

- Bug 706 has been marked as a duplicate of this bug. ***

#4 - 02/14/2003 07:42 PM - Gabriel Farrell

bug965 has some questions arising out of this but vegbank has been loaded with EcoArt 2.96

#5 - 02/14/2003 07:43 PM - Gabriel Farrell

make that bug985

#6 - 01/31/2005 02:54 PM - Michael Lee

changed from components that are to be deleted to "misc" so that bugs don't get deleted with component. Sorry for all the email.
