Mike should take a first run at this and then I will evaluate. This is rather urgent.

only one bug as a bucket for this change. First Lee design, then Peet evaluate, then Farrell implement, then Lee check that it works.

#5 - 05/06/2003 12:11 PM - Michael Lee

New plant query form has been designed! One can find this form here:

http://tekka.nceas.ucsb.edu/~lee/forms/plant-query_built_1.html

(this is the built version, after tokens have been substituted. Use

http://tekka.nceas.ucsb.edu/~lee/forms/plant-query_prebuilt_1.html

if you want to edit the form directly (or let me know how you want me to edit the form).

I now pass this form to Bob, and when he verifies/suggests improvements, it can be passed back to me or Gabe as is appropriate.

When this form is deemed what we need, it can then be quickly adapted to query communities.

#6 - 05/28/2003 05:42 PM - Gabriel Farrell

I have a partial implementioin of this form on beta.

<http://beta.nceas.ucsb.edu/vegbank/forms/plot-query.jsp>

#7 - 09/04/2003 04:35 PM - Gabriel Farrell

My last comment is invalid comment [#6](#)

See comment [#5](#) links for the new design. Basically a new query page for the plants. Very like the work on plots.

Currently Bob is reviewing Mike design and will pass the bug onto Mark when he approved of the design.

#8 - 09/09/2003 08:59 AM - Michael Lee

let's wait until 1.1 to build a new query page. Our current one gets the job done for now.

#9 - 02/10/2005 04:40 PM - Michael Lee

they are great now
