

Metacat - Story #7142

Upgrade Solr to 3.6 to fix searching issue

10/13/2016 04:42 PM - Lauren Walker

Status:	Closed	Start date:	10/13/2016
Priority:	Normal	Due date:	
Assignee:	Jing Tao	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	2.8.0	Spent time:	0.00 hour
Description It looks like Solr has trouble with using wildcards and case insensitive searching for fields - so when we search for originText:*Ashjian* we get 0 results, but with originText:*ashjian* we get 116. It looks like it was fixed in Solr 3.6: https://issues.apache.org/jira/browse/SOLR-2438 On Slack, Matt, Chris, and I agreed that at some point soon we should upgrade Solr in Metacat.			

History

#1 - 10/17/2016 10:53 AM - Jing Tao

- Assignee set to Jing Tao
- Target version set to 2.8.0

#2 - 10/19/2016 04:11 PM - Jing Tao

- Status changed from New to Closed

We upgrade Solr to 3.6.2 which is the balance between having the bug fix and newest compatible version (involving minimum code change). Lauren verified the bug had been fixed.
I input another ticket to upgrade solr: <https://projects.ecoinformatics.org/ecoinfo/issues/7148>
