

Metacat - Bug #7160

replicationPolicy missing numberReplicas and replicationAllowed attributes

11/22/2016 03:10 PM - Matt Jones

Bugzilla-Id:			
<b>Description</b> While technically optional, the ReplicationPolicy class in SystemMetadata is not useful without the replicationAllowed and numberReplicas attributes. We encountered a bug in the R client where the parser assumed those would be present ( <a href="https://github.com/ropensci/datapack/issues/63">https://github.com/ropensci/datapack/issues/63</a> ). We fixed that client side, but it would also be useful to have Metacat generate ReplicationPolicy instances with these attributes set. This is handled in SystemMetadataFactory.getDefaultReplicationPolicy().

- % Done changed from 0 to 100

Fixed by setting replicationAllowed=false and numberReplicas=0 if they aren't set explicitly.
