<b>Bugzilla-Id:</b>			
<b>Description</b>			
<p>The solr engine description information from DataONE has XSLT formatted output that includes a description of each field: <a href="https://cn.dataone.org/cn/v2/query/solr">https://cn.dataone.org/cn/v2/query/solr</a>. The corresponding metacat index output does not: <a href="https://knb.ecoinformatics.org/knb/d1/mn/v2/query/solr">https://knb.ecoinformatics.org/knb/d1/mn/v2/query/solr</a>. It would be very useful to provide users with this info to help them use/learn solr and our index.</p> <p>I wasn't able to find the .xsl file in metacat repo or the DataONE repo, so am not sure how to include this into metacat-index</p>
