

Metacat - Task #7204

Use the ldaps protocol to connect the ldap server

07/31/2017 04:41 PM - Jing Tao

Target version:	2.9.0	Spent time:	0.00 hour
Description			
<p>Current we use the StartTlsRequest to secure the connection between the Metacat and ldap server. The url for this connection is ldap://ldap.ecoinformatics.org:389/. Nick is thinking to close the port 389 and leave port 636 open, which is used for the ldaps protocol. So we may need to change the url to ldaps and some code as well. We also need to take a look at the ldapweb code as well.</p>
