

Morpho - Bug #7205

IDs mishandled when an update is made to a package with a DOI

08/10/2017 09:07 AM - Jeanette Clark

Description			
From a user:			
<p>"Hi Julien, sorry to bother you again but I have one more question. I'm trying to update my data sets to include the DOI for the accompanying article (it's not out yet but I just got the DOI). For one of my data sets I mistakenly hit "publish with DOI" and now I can't edit / update the record at all either online or via morpho:</p>			
<p>https://knb.ecoinformatics.org/#view/doi:10.5063/F12Z13MD</p>			
Online it says I don't have access, in morpho I get this error:			
<pre>"Problem with saving to metacat in EML200DataPackage! <?xmlversion = "1.0"><error>Could not write file: /var/metacat/documents/doi:10.5063/F12Z13MD.2: /var/metacat/documents/doi:10.5063/F12Z13MD.2 (No such file or directory)</error></pre>			
Any tips on how I can fix this and update the record to include the DOI?"			
It seems like the user accidentally applied a DOI and then tried to go back to Morpho to edit the package, where it tried to write the new identifier as the DOI.2			
The user's problem has been remedied but it seems like this behavior should be fixed
