Description

In MetacatUI we're getting a slight mis-formatting when displaying data package contents. This can be seen in the attached images. The issue was initially reported in MetacatUI as issue 379.

https://github.com/NCEAS/metacatui/issues/379

From Bryce,

"The HTML in question is actually produced by Metacat and MetcatUI is just rendering it without modification from Metacat's View Service. ... The fix would involve changing the underlying eml-2 XSLT."
