There are some weird rules for these. For all plots that are not releves, we
need a plot size, taxonObs area, etc. For all plots that are not public, we
need a confidentiality reason. These rules need to be compiled by lee and
passed to gabe for implementation in VegBank. This depends a bit on business
rules bugs.

done in XSD. What isn't handled by it, bug 793 captures.

#5 - 01/31/2005 02:54 PM - Michael Lee

changed from components that are to be deleted to "misc" so that bugs don't get
deleted with component. Sorry for all the email.
