Bugzilla-Id:	79		

Description

The mde application currently opens document windows in fixed sizes that are awkward to use and bear no relation to the current setting of the frame size, nor to the screen resolution. Need to make all of the windows open in a size that makes better use of available screen real-estate, and the window sizes chosen by the user should be persistent across sessions.

History

#1 - 09/22/2000 03:10 PM - Matt Jones

reassigned to jones

#2 - 10/26/2000 10:30 AM - Matt Jones

partially completed. I changed the window sizes to more fully take advantage of a 800x600 screen, but have not yet made the window automatically size based on the screen resolution nor have I made the window size settings persistent.

#3 - 04/09/2001 06:07 PM - Matt Jones

Lowered priority because we might drop MDE and replace it with another editing solution.

#4 - 07/12/2001 10:30 AM - Matt Jones

Irrelevant because MDE no longer in use.
