

VegBank - Bug #794

Evaluate viewing forms and input forms for VegBank Metadata

11/13/2002 01:54 PM - Michael Lee

History

#1 - 01/14/2003 01:22 PM - Michael Lee

This is a more commonly used bit of data that users will want to add outside of a plot. Also somewhat simple in implementation -- simple form linked to one or two tables. (A bit more for community -- but this functionality is quite central to what we're working on.)

#2 - 04/19/2003 07:43 AM - Robert Peet

I assume this bug is to review a form for entry of stratum method. Michael is working on this form. I reassign this bug to him in as much as I do not know the bug number for that task, or else I would enter the dependency above. He can pass it back to me after adding the dependency, or finishing the form and making reference to it in these notes.

We also need to prepopulate this with a few common methods from the ESA standards document, NPS PLots and TurboVeg. Perhaps that is a separate bug. I send this to Don with the hope that he can provide the initial population of the table to add Michael.

#3 - 04/21/2003 02:27 PM - Michael Lee

current form development from MTL can be viewed at:
<http://tekka.nceas.ucsb.edu/~lee/forms/>

#4 - 04/21/2003 02:30 PM - Michael Lee

Bob, please take a look at the forms on my tekka site as listed in the comment above. If you have edits or suggestions, you could make those to me, especially if major and I will redo the form, or make smaller suggestions to Gabe as he will be implementing the form soon.

#5 - 05/07/2003 09:24 PM - Robert Peet

I am ready to sign off on this bug as soon as Michale attends to the following. No need to pass it back to me.

- 1) Once we start accumulating a lot of references, and there will be thousands very quickly, it will be hard to find a reference via the pulldown. We need an option to search for a reference.
- 2) Don't forget to prepopulate this using the methods used in NPS-Plots, TurboVeg and NCVS
- 3) For form to view extant stratum methods we probably ought to provide as default a view that simply lists the name, description, & reference, with an option to click to see details. Else wise this will be cumbersome once we start accumulating a lot of methods.

#6 - 05/23/2003 04:01 PM - Michael Lee

Answering Bob's 3 points:

1) Once we start accumulating a lot of references, and there will be thousands very quickly, it will be hard to find a reference via the pulldown.

We need an option to search for a reference.

*MTL I think this should wait until version 1.1 as it is complex and we shouldn't rush optimization. Get the simpler form out first and then add these other ways of working. We plan on upgrading to a systematic way of dealing exchanging data between web forms and databases. This may make this much easier.

2) Don't forget to prepopulate this using the methods used in NPS-Plots, TurboVeg and NCVS

This is a separate issue, but a very valid one. See bug 1077 for more on that.

3) For form to view extant stratum methods we probably ought to provide as default a view that simply lists the name, description, & reference, with an option to click to see details. Else wise this will be cumbersome once we start accumulating a lot of methods.

http://tekka.nceas.ucsb.edu/~lee/forms/stratumMethod_qry_short.html is the shorter form. Again, we may want to wait a bit before implementing this, as it isn't truly necessary, but is a nice optimization that is convenient for users.

#7 - 07/23/2003 01:35 PM - Gabriel Farrell

The work Mike is doing on the display will allow this bug to be closed so reassigning.

#8 - 07/24/2003 07:48 AM - Michael Lee

Once these forms have been reviewed, this bug can be closed. This will now serve as the bug to evaluate all forms that are linked to from the following pages:

<http://vegbank.nceas.ucsb.edu/vegbank/general/metadata.html> has a link that shows stratumMEthods (summary and details)

<http://beta.nceas.ucsb.edu/vegbank/general/input.html> has a link that allows one to add new ones

#9 - 12/01/2003 02:15 PM - Michael Lee

evaluation should be on overall approach for viewing data and the collection of forms that will then be available.

#10 - 11/08/2004 05:52 PM - Michael Lee

they are spectacular!! New views are excellent.

#11 - 01/31/2005 02:52 PM - Michael Lee

changed from components that are to be deleted to "misc" so that bugs don't get deleted with component. Sorry for all the email.
