ML should get the specs for PC-Ord export from Roberts for bug 877 to be done.

#2 - 04/21/2003 11:10 AM - Michael Lee

later, this not for 1.0.0

PC Ord is a program often used by ecologists to help analyze lots of plots. There is a special csv-type format that it requires with variables not longer than a certain length for categorical variables (as opposed to numeric). If users could download plots directly into this format, it might really increase the desirability in using VegBank, at least for those who use plots to classify vegetation.
