bug 1611 is Tim Howard's plots. So what data are these 1500? Alvar is not nearly that big. For now, Alvar is considered PART of this.

**#4 - 01/19/2005 07:01 AM - Don Faber-Langendoen**

The NY ESF is a 1500 subplot (500 plot) forest dataset. The 85 plot alvar dataset is an international dataset. No relation between the two. Tim was going to load the NY ESF plots, but doesn't have time.
