#### History

##### #1 - 01/21/2003 07:28 PM - Michael Lee

circa 40,000 plots added for 2.0.0

##### #2 - 07/09/2004 11:12 AM - Michael Lee

12962 loaded into VegBank module. Working on exporting to XML and then into VegBank!

##### #3 - 07/27/2004 11:50 AM - Michael Lee

Jennings passed data to Michael. Michael put through VegBranch. We have the limiting factor of XML import though. 100 plots take 25 min. So 12962 would take 2 days and 6 hours at the same rate. VegBank may be faster than gyro. Considering putting them in via SQL.

##### #4 - 08/10/2004 10:02 AM - Michael Lee

1K in VB  
13K in gyro: optimizations needed!

reload with alliances translation

25K more from MJ

##### #5 - 09/14/2004 02:36 PM - Michael Lee

plots have moved through VegBranch again, this time with community names. When other plots in batch are ready (NPS, Karin?), then I'll move all of them into vegbank at once (unless performance dies when this happens)

##### #6 - 10/27/2004 03:56 PM - Michael Lee

XML being written now, will be put here:  
<http://gyro.nceas.ucsb.edu/~lee/plots2load/>

first 7 sets of 500 (out of 26 sets) are already there.

##### #7 - 11/19/2004 07:40 PM - Michael Lee

on vegbank.org and ready to go!

##### #8 - 01/31/2005 02:53 PM - Michael Lee

changed from components that are to be deleted to "misc" so that bugs don't get deleted with component. Sorry for all the email.

##### #9 - 03/27/2013 02:15 PM - Redmine Admin

Original Bugzilla ID was 887
