Description

ML/RP

History

#1 - 01/21/2003 07:28 PM - Michael Lee

circa 40,000 plots added for 2.0.0

#2 - 09/11/2006 04:26 PM - Michael Lee

Bob Peet has a lot of plots, some of which have been loaded into VegBank, but not in their full richness of data. New plots need to be loaded, and probably will be loaded directly from the CVS (Carolina Vegetation Survey) database which is based on VegBank architecture. So the upload should go quite smoothly.

The data there must be prepared for import as far as quality control goes and any embargoes must be first applied. Some care should be taken as to how many of the user defined variables should be loaded.
