History

#1 - 02/15/2003 12:09 PM - Michael Lee

ok, working on this

#2 - 11/21/2003 09:59 PM - Michael Lee

we actually want 2000 plots in vegbank by end of Feb. Don't need to be NPS plots. Perhaps some of the failed NPS plots will make it this time.

#3 - 10/27/2004 02:30 PM - Michael Lee

Data output to XML from VegBranch. Ready to load.

#4 - 10/27/2004 03:57 PM - Michael Lee

XML for Jim Drake plots are here:

<http://gyro.nceas.ucsb.edu/~lee/plots2load/nps/>

#5 - 11/08/2004 05:49 PM - Michael Lee

Jim's 3800 plots loaded to VegBank2. Need to do some compressing of duplicates and QA. TAxonIntpretation.party_ID is wrong, due to VegBranch error. Suggest SQL manual fix AFTER BACKING UP DB.

#6 - 11/25/2004 11:34 AM - Michael Lee

duplicates have been removed.

#7 - 11/25/2004 12:11 PM - Michael Lee

created SQL to run against DB to fix TaxonInterpreters. Testing on aldo now. TaxonInterpreter is either plot author or PI, whichever is available for NPS plots.

#8 - 12/16/2004 01:17 AM - Michael Lee

successful QA completed, focusing on FK's for each observation, compiling the total number of related entities and comparing for source (vegbranch) and destination (vegbank). Matches were 100% correct, except for classContribs, which might not have been written into XML. Checking on that last aspect.

#9 - 01/31/2005 02:53 PM - Michael Lee

changed from components that are to be deleted to "misc" so that bugs don't get deleted with component. Sorry for all the email.
