Isn't this up to the user to specify confidential or not?

#2 - 04/19/2003 09:04 AM - Robert Peet

We should wire a default that data are public unless the person submitting the plot indicates otherwise.

We need the option for the management to later change this attribute via a web form, generally where a legit case is subsequently made to make the plot location confidential.

#3 - 11/24/2003 10:38 AM - Michael Lee

new model handles this. DB management should be allowed highest permissions, including changing embargoed status of plots.

#4 - 01/31/2005 02:54 PM - Michael Lee

changed from components that are to be deleted to "misc" so that bugs don't get deleted with component. Sorry for all the email.
