Target version:	EML2.0.0		**Spent time:**	0.00 hour
Bugzilla-Id:	924			

Description

Arguments for date time values to be interval and ordinal. Both have their points. Decided we need to make a new "datetime" scale specifically for date time values. This should allow separate specification of the format of the value and its procision and its domain.

History

#1 - 12/05/2002 07:43 PM - Matt Jones

Done. Please review the changes to datetime handling, and the improved documentation throughout eml-attribute.xsd.
