Description This is the release tracking bug for the final (yeehaa!) release of eml: eml-2.0.0. Need to finish these things before the release is cut: 1) change all namespaces to eml-2.0.0 2) regenerate all png images where needed 3) generate release docs and proofread them 4) tag sources and call for a vote on the release from project members 5) cut the release and be done with it Anything else? Add it here and I'll see its done.			

History

#1 - 12/06/2002 03:55 PM - Matt Jones

Changed all namespace names to eml-2.0.0 (1)
Regenerated needed png images (2)
Revised README and index.html documents for new release, and proofed them (3)
Tagged the sources as RELEASE_EML_2_0_0 and am writing email to call for vote (4)
