

Morpho - Bug #934

attribute editing window doesn't change domain properly

01/07/2003 04:36 PM - Matt Jones

Description			
Dan,			
<p>Another new bug that needs to be fixed for the 1.3 release. When one chooses to add a new column in an existing data table, the window that is used for collecting the attribute metadata displays a table for entering enumerated values even if the radio button is set to 'Text' or 'Numeric'. This is a problem. Instead, it should change fields as the window in the TextImport wizard does to reflect the different fields that are needed for the various types of domains.</p>			
Thanks, Matt			

History

#1 - 01/07/2003 08:32 PM - Dan Higgins

Problem occurred because object added to class for use with TextImportWizard were null when used with new data table columns. Simple fix to check if objects are null and not try to set values.
