#### Description

Need to have a way for users of VegBank to see who each other are - specifically who it was that submitted a plot and what their qualifications are. This includes much information from the user database that the user filled out on registering or requesting certification.

#### History

##### #1 - 01/14/2003 04:51 PM - Michael Lee

fields include all fields marked with a blue # on the form:

This is done, a prototype at least, on vegtest:

registry of users exists. When we finally link plots to users in terms of contributions (really soon), it would be nice to link this information to the registry of certified users. see

for example of registry

changed from components that are to be deleted to "misc" so that bugs don't get deleted with component. Sorry for all the email.
