Target version:	1.3		**Spent time:**	0.00 hour
Bugzilla-Id:	969			
Description				
Eml beta6 has triples in dataset file, but eml2 documents don't have any triples. Maybe it will cause some problem in metacat, maybe not.				

History

#1 - 03/12/2003 05:02 PM - Jing Tao

Metacat basiclly was designed to handle single document rather than package.
Without triple would not cause any problem. The testing proved it too.
