

Jalama - Bug #988

doPost params swapped in path from jlcommandproxy.cpp->jlsvmregistry.cpp->jlsvmregistrybinding.java

02/12/2003 03:21 PM - Matthew Brooke

Bugzilla-Id:	988		

Description

1) currently, the "command" and "params" args for doPost() get passed in the wrong order from jlcommandproxy.cpp to jlsvmregistry.cpp; the latter expects (command,params), but gets (params,command).

However, the whole system works OK, because the params get passed in the wrong order again, from jlsvmregistry.cpp to jlsvmregistrybinding.java :-)

These classes should be changed so correct order (command,params) is maintained throughout.

History

#1 - 03/12/2003 03:03 PM - John Harris

Fixed this so that all doPost methods take command then parameters.

#2 - 03/13/2003 03:46 PM - John Harris

Fixed this, works on all platforms with all renderers.

#3 - 03/13/2003 03:46 PM - John Harris

closing the bug.
